

Lungevity

SUPPORTING GUERNSEY LUNG HEALTH

Registered Guernsey Charity no. 302 & Member of Association of Guernsey Charities no. 326

We are holding our inaugural open day and fundraising event on 21st April 2018 from 10.00am to 4.00pm at Le Friquet Garden Centre to raise the awareness of respiratory disease and would love it if you could take time to visit us to find out more about the work we do and how we can help you, or somebody you know, who is affected by respiratory disease. We are also looking for volunteers to help us grow and maintain our charity, could you help us?

- ❖ Did you know that Lungevity is Guernsey's only dedicated respiratory charity?
- ❖ Did you know that respiratory disease is the second biggest killer globally?
 - ❖ Did you know there are over 40 types of respiratory disease?
- ❖ Did you know that Lungevity is here to help support you and your family if you suffer from any form of respiratory illness?

Respiratory Clinical Nurse Specialist, Rosemary Kealey and Respiratory Physiotherapist Hannah Lord shall be on hand to demonstrate correct inhaler use and technique, breathing exercises and to offer support and advice to anybody who suffers from any form of respiratory illness.
